CROSSING BREYDON WATER

Bridge Clearance
Clearance at mean high water during the summer is given below, but always check the bridge clearance boards. Look out for additional advance clearance boards as you approach bridges 1 and 3 on the River Bure. The river is narrow and tides can be strong. Lower your canopy in plenty of time. Make sure everyone is down inside the boat.

1 Breydon Bridge 3.96m (13'00"")
Pleasure craft capable of passing under the bridge are requested to go through the right hand side span in each direction.

— Navigate between the two arrows on the bridges —

2 Vauxhall Bridge 2.06m (6'09"")

3 Yarmouth/Acle Road Bridge 2.13m (7'00"")

NB: In all cases tidal levels can vary considerably and so affect the above figures.

WATCH OUT FOR WATER SKIERS in the central straight of Breydon Water – see signs on posts.
